MYALARM.CHAT ®

Cancel **Dispatch**

MS JS

A Burglary alarm was received from 1234 Safety Way Yourtown, NJ. The signal was received at 12:34:00 on MM/DD/YYYY

Click "Dispatch" to request immediate dispatch of the authorities or click "Cancel" and enter your verbal password

OK, I'll request dispatch. 12:35
John S

No, dad, I'm at the mall with my friends. 12:35
Mary S

Mary, did you set off the alarm? 12:34
John S

Enter message:

Send Message

SMS notification + secure web-based interface give you the ability to reduce false alarms or increase speed of authority dispatch
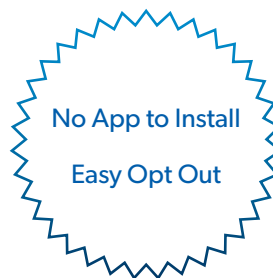

Key Features

Fast and Secure

Once enrolled, SMS messages are sent to your verification number(s) and the contact(s) you designate immediately upon receipt of your alarm signal.

Communicate. Cancel. Escalate.

Each message contains a link to a secure and encrypted chat room so you can communicate to make the best decision about your security. Then, you can **CANCEL** or **ESCALATE** the alarm with just a few clicks.

Technology You Already Use & Trust

You're already comfortable with SMS text messaging, and may even prefer them to telephone calls. And… you're not sacrificing the service you rely on. If you don't open the SMS and choose CANCEL or ESCALATE, **the monitoring center will call you – exactly the way they do today.**
